

## Proposal Management System

### Task 1:

The project has two module User and Admin.

#### User:

1. Make a registration form with required field Name,Email,Contact,Password.
2. After registration login with user's email and password and access the user's dashboard.
3. On user's dashboard there will be a provision for applying the proposal.
4. Proposal form required fields will be
  - a. Project title
  - b. Project description
  - c. Objective
  - d. Duration
  - e. budget
  - f. Address details (State,District,Po,Ps,Pin etc)
  - g. Bank details (Bank name, IFSC code, Account Number, etc)
  - h. Income details (In detail)
  - i. Land details (In detail)
  - j. Documents like Photo, Address prof, Income prof, etc.
  - k. Remarks.
5. After submitting the proposal form, user can monitor their proposal status.

**Note:** If Admin reject the proposal, user can view the proposal if there will be an issue with that particular field, the specific field will be highlighted. And users can edit that field and submit the proposal.

#### Admin:

1. Login with Username and password.
2. Admin will have their own dashboard.
3. On the dashboard some parameters will be showing i.e Total users, total Proposal, approved total proposal, pending total proposal, reject proposal etc.
4. Admin can view the pending proposal and give approved with comment or reject.

**Note:** If the proposal was rejected then admin has to highlight the specific field which has the issue where user will be able to edit the form.

### Task 2

Make a provision for Online Video Conference System by admin with the users using 3<sup>rd</sup> party app like WebEx, Zoom, skype etc.
